Standards Advisory 3-20-2000 – Proxy – Code Version

1. Proxy Code Version

Comply with KETS Proxy Standards:

- Every Proxy server in district must be configured at:

  - Microsoft NT Server Version 4.0 w/ Service Pack 6a applied
  - Microsoft Proxy Server 2.0 w/ Service Pack 1 applied

How to tell what version?

- (NOS) Microsoft NT Server

  - Go to Start > Settings > Control Panel, then on the File Menu choose Help and then About Windows NT

- For Microsoft Proxy Server

  - Open the Microsoft Management Console, right-click on 'Web Proxy' and click 'Properties'. The version number should be 2.0.389.

Location of Service Packs
